

GIGASET E630 HX

Description

Designed to withstand tough everyday situations

If you have a craft workshop or a home with small children, you know how to handle a high-impact environment. So does the Gigaset E630 cordless phone. Surrounded by tools and equipment, or kids, challenges and disruptions are par for the course. That's why this robust cordless phone is splash-proof, as well as resistant to dust and shocks.

Comfortable and convenient handling

A vibrating caller alert and light signal mean you're always aware of incoming calls, even in a noisy environment. The comfortable handset makes talking a pleasure, with an easy-to-reach side key for fast and convenient volume control. This landline telephone has great sound quality. And if you do miss a call, a message key keeps you in the loop.

Enhanced with practical settings

You can very easily adapt the phone profile to your loud or quiet surroundings. Simplified call acceptance lets you answer the phone even if your hands are soiled or sticky. Fuss-free navigation thanks to the clear menus, an illuminated keypad and a TFT colour display makes it easy to browse the phonebook that efficiently stores up to 150 contacts.

GIGASET E630 HX

Radiation-free phoning thanks to ECO DECT.

Like all Gigaset cordless phones, the E630HX is equipped with environmentally friendly ECO DECT technology. The phones are radiation-free in standby mode, even when you're using multiple handsets, provided that the base and all connected handsets support ECO DECT. During a call, the transmission strength automatically adapts to the distance between the handset and the base. The closer the base, the lower the radiation. For maximum DECT range, you can disable ECO DECT mode at any time.

Specifications

Gigaset E630HX

General settings	
Article name	Gigaset E630HX
General features	
Connection	Analog ISDN VoIP
